

## Product Info

Date: 12/1 2006	Product info.: 2-2006	Written by: Fredrik Delås
Item: Drum brake - Wire	Delivery: From this date	

Based on feedback from the market, we are now starting to mount the drum brakes in a different way.

The drum brakes are mounted, as shown in the picture, so that the wire is lead forward instead of rearward. Mounted like this, the wire will not stick out behind the chair. This solution is tested and approved by technical department.
