Item: Red colour	Delivery: From this date	

## Alu Rehab is making the wheelchairs easier to use

In order to make the wheelchairs easier to understand and to use, Alu Rehab has been looking at the usage of colours to increase this understanding. In co-operation with designers we have come up with a solution. In the next three month period this will fully be implemented to all adjustment wheels and brake handles on the wheelchair. The exact dates depends on emptying of stock.

The parts that will be changed are:

1. Adjustment wheel for head support.
2. Brake handles.
3. Adjustment wheel for foot support.
