

# Flexible Hemiplegic support

ALU REHAB™  
Thinking ahead - moving forward

- Flexible solutions
- Light and easy
- Safe to use

Hareid hemiplegic cushion is a welcome and flexible replacement for more traditional hemiplegic armrests. The hemiplegic cushion allows the user to move the arm to the desired position.

The cushion can be doubled and the ends tied together to allow it to rest loose in the chair, or it can be tied permanently to the armrest.

The whole cushion is washable. The outer cover is fire-resistant for greater safety. Now available with new outer cover in Mars fabric. Art. no. 3954.

**PRODUCT INFORMATION 2008/7** Art.no. 3954

NO: 2008/7

SUPPLY OF NEW PRODUCT: JUNE 2008
