

Wheelchair labelling moved – from lower frame bar to back crossbar.

NEW: labelling on back crossbar.

Photos below: previous labelling on lower frame bar.

Because of a conflict arising in connection with the use of a frame extension piece with brake on the lower frame bar, and in order to make the frame "cleaner", we are now moving the chairs' labelling from the left side of the lower frame bar to the right side of the back crossbar.

The change will be immediately effective in production. (This will apply to Netti I allround/comfort, Netti II comfort and Netti III comfort).
